- 13.29. When an incoming Card transaction (replenishment) is carried out on an Investment Card through the Client's Payment card Account, it is automatically transferred to the Brokerage Account based on the permanent order of the money sender.
- 13.30. In cases of absence/revocation of the permanent order of the sender of the money and (or) closure of the Brokerage Account, the Payment card Account is automatically blocked and then closed. The Payment Card Account is closed in accordance with the internal document governing the rules for opening, maintaining and closing accounts of

individuals, and these General Conditions.

- 13.31. In the event of a seizure of funds within the established amount of the prohibition on the use of funds located in the Payment Card Account, and (or) in the event of suspension of expenditure transactions on the Payment Card Account in accordance with the Current Legislation, the standing order of the sender of the money cannot be executed by the Bank.

Authorization of Card Transactions and/or debit transactions on the Payment Card Account will not be available to the Client until the arrest on the funds in the Payment Card Account is lifted and/or until debit transactions on the Payment Card Account are resumed.

- 13.32. The issue of a Multicurrency Card/Investment Card is carried out simultaneously in 4 (four) currencies (KZT, USD, EUR, RUB).

For a Multicurrency Card, the main currency of the account is KZT. For an Investment Card (with multicurrency functionality), the main currency of the account is USD. At the same time, the issued Investment Card allows the Client to subsequently open additional accounts in any of the other 3 (three) currencies (CNY, TRY, AED) during the validity period of such a card based on an application for opening an additional account to the payment card approved by the Bank.

- 13.33. For a Multicurrency Card/Investment Card (with multicurrency functionality) linked to four accounts in different currencies simultaneously, provided that the required amount is available in the account in the corresponding currency of the Card transaction, the amount in the currency of the Card transaction is immediately debited without conversion.

- 13.34. If there is insufficient money or no money in the account:

- a) To debit the amount in the currency of the Card Transaction on a Multicurrency Card, the missing amount is covered from the Payment Card Account in another currency and simultaneously converted into the currency of the Card Transaction at the exchange rate set by the Bank on the date of the transaction. The priority for debiting in the currency of the Multicurrency Card accounts is established as follows:

KZT → USD → EUR → RUB;

USD → KZT → EUR → RUB;

EUR → KZT → USD → RUB;

RUB → KZT → USD → EUR;

- b) For an Investment Card with multicurrency functionality, for debits in the card transaction currency, the missing amount is covered from the Client's brokerage account in a different currency, simultaneously converting the amount into the card transaction currency at the rate set by the Broker. The priority for debits in other currencies from the Client's Brokerage Account is set in descending order, from the largest to the smallest amount in US dollar equivalent, regardless of the currency of the debit.

In the event of a refund of the amount of a Card transaction made using a Multicurrency Card/Investment Card (with multicurrency functionality), the missing amount debited in another currency is credited to the account from which the missing amount was debited, with simultaneous conversion into the account currency at the exchange rate set by the Bank on the date of refund.

If the currency of the Card transaction does not match any of the currencies of the Multicurrency Card/Investment Card (with multicurrency functionality), the amount of the Card transaction is debited from the account in USD.

In this case, the priority of debiting in foreign currency on a Multicurrency Card is set as follows: the currency of the Card transaction USD → KZT → EUR → RUB.

The priority for debiting in foreign currency under the Investment Card is set as follows: Card transaction currency USD → KZT → EUR → RUB → CNY → TRY → AED

depending on the availability of the account.

When transferring between accounts, conversion is carried out at the exchange rate set by the Bank for transactions at the time of the transfer.

When replenishing a Multicurrency Card/Investment Card (with multicurrency functionality), funds are credited to the account corresponding to the deposit currency.

When replenishing a Multicurrency Card/Investment Card (with multicurrency functionality) in a currency other than the primary account currency, funds are credited after conversion into the primary account currency at the exchange rate set by the Bank on the date of receipt of the financial document.

13.39. Deposit Cards/Children's Cards are issued simultaneously in two currencies (KZT, USD). During the validity period of such Cards, additional accounts may be opened for the Client (based on an application to open an additional account to a payment card approved by the Bank) for the issued:

- Deposit Card in 9 (nine) currencies (EUR, RUB, CNY, TRY, AED, KGS, TJS², GEL², UZS²);

- Children's Card in 5 (five) currencies (EUR, RUB, CNY, TRY, AED).

In this case, for the Deposit Card/Children's Card, the main account currency is KZT.

13.40. The Deposit Card is linked simultaneously to all accounts opened upon its issue and allows the amount of the Card transaction to be debited instantly, without conversion, provided the required amount is available in the corresponding account, in a currency that matches the currency of the Card transaction.

13.41. If there are insufficient or no funds in the account to debit the currency of the Card transaction using the Deposit Card, the missing amount is covered from another account, with the amount in the currency of the Card transaction simultaneously converted at the exchange rate set by the Bank on the date of the transaction. The priority for debiting the account currency is determined as follows (if the relevant currencies are available):

KZT → USD → EUR → RUB → CNY → TRY → AED → KGS² → TJS² → GEL² → UZS²;

USD → KZT → EUR → RUB → CNY → TRY → AED → KGS² → TJS² → GEL² → UZS²;

KGS² → KZT → USD → EUR → RUB → CNY → TRY → AED → TJS² → GEL² → UZS²;

TJS² → KZT → USD → EUR → RUB → CNY → TRY → AED → KGS² → GEL² → UZS²;

GEL² → KZT → USD → EUR → RUB → CNY → TRY → AED → KGS² → GEL² → UZS²;

UZS² → KZT → USD → EUR → RUB → CNY → TRY → AED → KGS² → TJS² → GEL².

13.42. If the currency of the Card transaction does not match any of the currencies of the Card accounts, the amount of the Card transaction is debited from the account in USD.

Transaction currency USD → KZT → EUR → RUB → CNY → TRY → AED → KGS² → TJS² → GEL² → UZS². When transferring between Card accounts, conversion is carried out at the currency sale/purchase rate set by the Bank for transactions at the time of the transfer.

- 13.43. Cash withdrawals from payment card accounts in CNY/TRY/AED/KGS²/TJS²/GEL²/UZS² are not available at the Bank's branches/offices.
